Niche: Home security systems

Review #1: I really loved it when the trained professional, after spending almost an hour demonstrating how the device worked, never pressurized us to buy. Unlike the other sales guyz, his motive was to educate us and not to sell us something.

Review #2: With the ADT Monitored Home Security System, I would want my home to be burglarized. In that way we could catch hold of all the thieves in my neighbourhood.

Review #3: I just learnt that every ADT monitored alarm is connected to a comprehensive security command network manned and backed up by trained professionals. This is one of the most opted home security systems in the States, and I too, agree to the quality of the product in terms of value for money.

Review #4: Your family deserves the peace of mind when it comes to safety, and, nobody does it better than the ADT monitored home security system.

Review #5: Out of the 2 million burglaries in 2009 – more than 70% happened in residential homes. I have scanned the markets for better products, but found none at this price!
